Dinosaurs of Eden follows two teenagers traveling through time discovering facts about dinosaurs in many eras. From their creation on Day 6, then in the Garden of Eden, many kinds of dinosaurs can be seen. Noah had to have taken them on the ark,

Job describes them as fully alive later, and some may still be around today. On their journey, the teens also witness the fall of man, discover the need for a Savior, and travel into the future to see the judgment. Scripture and historical information are intertwined to present a factual account of history from the creation to the judgment by way of salvation through Jesus Christ.
