Whether it's ex-boyfriends or exercise, popularity or peer pressure, The Teen Quiz Book

will help teens figure out what's most important to them. Is he boyfriend material? Are you making the most of school? What's your beauty type? Over sixty quizzes allow teenage girls the opportunity to explore personal issues in a comfortable, no-holds-barred atmosphere often not found with Mom and Dad. Arranged into chapters that deal with specific areas in every young woman's world, The Teen Quiz Book tells it like it is when it comes to the problems inherent in traveling through those difficult junior high and high school years. Written in a down-to-earth, hip style, The Teen Quiz Book covers a range of topics, both serious and not-so-serious. From fashion, friends, and family to relationships, health, and school, this all-about-you guide will provide an outlet for self-discovery. The answers are honestly written in a style teens can relate to. In the boyfriend quiz, for example, a girl who scores mostly A answers learns "You would get more respect and compassion from your big brother. Try to find a guy who will give you more attention and treat you properly". From a quiz about real friends, a girl might learn 'You are lucky to have friends like these. Hold on to them. They are true friends".
