isbn:9780736809528

Explore the natural world's most basic elements, from the deep layers of the Earth and plate tectonics to the rocks, soil, minerals, and fossils we find on its surface. Well-organized and easy-to-read text complements bold, colorful photographs to help readers learn and understand more about the Earth and its continually changing features. This series explores and supports the standard "The Physical Setting: Processes That Shape the Earth," as required by Benchmarks for Science Literacy: Project 2061.
