What is the brain made of? Can a person live without a whole brain? Does watching violence on TV affect a person's behavior? Why can smells bring back memories? The answers to these puzzling questions?and 97 more?are revealed in this thought-provoking book about the brain. From basic information on how the brain

works to more complex issues such as the nature of intelligence and the mystery of emotions, science expert Faith Hickman Brynie provides authoritative information about the center of our nervous system.
