# Starting Out with Java

[Starting Out with Java_下载链接1](#)

著者:Gaddis, Tony

出版者:Addison-Wesley

出版时间:2007-1

装帧:Pap

isbn:9780321479273

Tony Gaddis's accessible, step-by-step style helps beginning students understand the important details necessary to become skilled programmers at an introductory level. Gaddis motivates the study of both programming skills and a programming language by presenting all the details needed to understand the "how" and the "why"--but never losing sight of the fact that most beginners struggle with this material. His approach is both gradual and highly accessible, ensuring that students get the logic behind developing high-quality programs. In Starting Out with Java: From Control Structures through Objects, Gaddis covers procedural programming--control structures and

methods--before introducing objects in the latter part of the book. As with all Gaddis texts, clear and easy-to-read code listings, concise and practical real-world examples, and an abundance of exercises appear in every chapter.
