isbn:9780738703930

Being a witch is not just about casting spells. It is also about the magick of nature and life. This book shows teenagers how natural magick is both quietly beautiful and unstoppably powerful, and how they can harness that energy to better their own lives. The young seeker will be introduced to the theory of witchcraft, the God and the Goddess, and ethical considerations. There are elemental meditations, correspondence charts, information on nature spirits, magickal herbalism, spells, and charms.
