出版者:Bis Publishers

出版时间:2005-7

装帧:Hardcover

isbn:9789063690885

Dutch Architects 7 is the most comprehensive overview of Dutch architecture available today. It presents the most recent projects of 120 architects, interior architects, urban planners, and landscape architects and provides excellent insight into the signature style of the Dutch and the unique contribution they make to contemporary architecture. The associated website, www.architectenkeuze.nl, is a handy tool that

allows the browser to select an architect for a project using objective criteria. The book carries a comprehensive address index that provides contact details for all of the companies featured - and that means just about every architectural office on Dutch soil. A must have for anyone interested in contemporary architecture, Dutch Architects 7 is the ultimate guide to the field of spatial design in the Netherlands.
