isbn:9780415954013

"To Scale "is a powerful reference for students, architects, urban designers and planners. It features one hundred famous urban plans all drawn to the same scale. In past, publication plans have been drawn to different scales preventing designers from accurately comparing different plans. "To Scale" saves designers, planners and architects the effort of having to rescale plans and provides not only accurate renditions of noteworthy urban spaces, but serves as a useful guide for designers crafting their own plans. Each plan is accompanied by a one page summary of the site discussing its history and design.
