著者:Alexander Schilling

出版者:Birkhäuser-Publishers for Architecture

出版时间:2007

装帧:Paperback

isbn:9783764376499

Models make it possible to visualize an architectural idea in three dimensions. Designing with models and presenting ideas is an important step in the design education process. Modelbuilding includes important instruction on the typologies, materiality, construction, and presentation of architectural models.

作者介绍:

Alexander Schilling is employed as an architect and is also an independent builder of

architectural models. He has prepared competition and presentation models for various architectural firms and constructed large-scale models of well-known buildings. He also advises students and architects in the selection of materials and model-building methodology.

目录: Foreword
The architectural model as a means of representation
Types of models
Design and concept development
Equipment, tools and techniques
Materials
From drawing to model—steps and approaches
In conclusion
Appendix
