Our cities and neighborhoods are composed of Urban Building Blocks and a knowledge of these elementary components is part of the basic equipment of city planning. It is absolutely essential for urban design that one understands their form and structure, their functional conditions, and the differentiation into private and public spheres, as well as the ways they are networked into their surroundings. Study of these city building blocks represents a first step toward understanding, and successfully developing the built structure of the city as a physical and social habitat. Themes are - the row, - the block, - the courtyard (the block in reverse), - the passageway, - the line, - the solitaire, - the group, - the "shed."

评论

urbanism课程，urban design模块必读参考文献，很薄的书，所以是全本必读。就是基于一些研究进一步明确城市block的类型和分类，这里block指高于建筑单体又低于城市街区or社区尺度的建筑群落形式，其建筑形态和单体关系均具有意义，因此其类型对于城市研究和规划也尤为重要。恩我的感想么，文献太多读得好累碰到这种迅速读完的真心没感想了。
