isbn:9780912158853

Now in its fifth printing, this volume provides an architectural and social history of the turn-of-the-century, craftsman-style American dream house in which an owner of modest means could live "simply and artistically". California provided the perfect

landscape -- scenically, economically, and socially -- for the proliferation of examples ranging from do-it-yourselfers and mass-produced builders' cottages to the sophisticated artifacts of the Greene brothers and the Heinemans.
