This beautiful and unique reference provides an unrivaled mine of inspiration and ideas for anyone wishing to create a colorful new look for their home or garden!

In this stunningly produced guide, internationally renowned interior designer Kevin

McCloud puts together over 1,000 color chips arranged in over 80 palettes. Each palette—which includes anywhere from 6 to 16 color swatches—forms a blueprint for a unique decorative scheme. A palette based on old Chinese silk, for example, is seen reinterpreted in a contemporary New York apartment.

Plus, each palette features gorgeous photographs that bring the color scheme to life, along with invaluable advice and tips for using the colors to transform a room. Readers will also find manufacturers' paint references and numbers, lists of suppliers, and much more. The ultimate color sourcebook!
