THE SOURCEBOOK OF CONTEMPORARY ARCHITECTURE presents more than 300 noteworthy case studies in its 650 pages, the first large-scale book of its kind to

showcase a complete and diverse range of structures worldwide. The case studies incorporate every type of architectural project possible—private, commercial and public—making this lushly illustrated, information-rich book an invaluable resource that architects and architectural students will turn to again and again. Each case study includes a succinct description of the project at hand, listing its name, client, and location and presenting its unique objectives, challenges, and solutions. Every case study also features numerous full-color photographs and detailed renderings of site and floor plans. Finally, each case study provides a full listing of those involved in the project: the architectural firm and its participating architects; engineers; consultants; and contractors. The book features the work of world-renowned architects such as Gehry Partners, Ateliers Jean Nouvel, Santiago Calatrava, Richard Meier & Partners, Skidmore, Owings & Merrill, Philippe Starck, Tod Williams Billie Tsien & Associates, Daniel Claudio Taddei, Diller Scofidio, and others. Well-known projects include New York's Modern Museum of Art redesign and Time Warner Center, England's Selfridges Birmingham, and the MIT Stata Center in Cambridge, MA.
