isbn:9783832790769

Wood is one of the oldest building materials known to man. It has valuable characteristics that make it a material of choice; it is highly ecological, and can be used for all kinds of structures. In addition, it has excellent insulation and soundproofing qualities. Moreover, its texture imparts a warm finish to interiors of any style. And, of course, wood is highly prized in furniture for its beauty and adaptability. Wood Houses presents a selection of dwellings that are made of wood, including particular focus on the use of wood in kitchens, bedrooms and even bathrooms.

作者介绍:

Aurora Cuito is an architect and writer based in Barcelona. The author of several titles in teNeues' Archipocket, Ultimate and Cool Restaurant series, she has also worked in architecture and interior design firms in New York and Barcelona.
