A highly original treatment of the central questions in philosophy of action and epistemology

Will become a landmark publication in the field

At the cutting edge of contemporary philosophy, while deeply informed by historical scholarship

Human agency has four irreducibly different dimensions — psychological, ethical, intellectual, and physical — which the traditional idea of a will tended to conflate. Twentieth-century philosophers criticized the idea that acts are caused by 'willing' or 'volition', but the study of human action continued to be governed by a tendency to equate these dimensions of agency, or to reduce one to another. Cutting across the branches of philosophy, from logic and epistemology to ethics and jurisprudence, *Action, Knowledge, and Will* defends comprehensive theories of action and knowledge, and shows how thinking about agency in four dimensions deepens our understanding of human conduct and its causes.

Readership: Scholars and students in philosophy of action and epistemology; others interested in understanding the main concepts we use to think and reason about human conduct and its causes.

评论

气象恢宏。从对经验主义传统影响下的volition theory的批判开始，逐渐深入到对causation、explanation等基本概念的分析。积蓄已久之后，通过从本体论上重新界定knowledge一下将人类生活的各个层面都锚定在truth之上。对各个传统的分析与把握令人拍案。至于新理论框架的阐发，大概Hyman已经能够把自己和Anscombe、Davidson的名字并列在一块儿了。

视野开阔，分析细腻，有日常语言学派的遗风
