What happens when form follows function, and the only boundaries are the laws of physics? As innovative materials and manufacturing techniques become readily available, the limitations of design are rapidly falling away. These advances have led to a redefinition of the spaces we inhabit, as everyday items become objects of art. DesignDesign: Furniture & Lights is a celebration of originality and innovation, featuring hundreds of beautiful full-color photographs of works by highly acclaimed designers such as Xavier Lust, David Abad, Guido Rosati, Oscar Tusquets, Alvaro Sizaand, Ingo Maurer, and many more. Curated by renowned design expert Oscar Asensio, DesignDesign is an essential sourcebook for astute interior designers, collectors, and

connoisseurs on the cutting edge
