著者:John Ochsendorf (作者)

出版者:Princeton Architectural Press, New York

出版时间:2010-12-15

装帧:Hardcover

isbn:9781616892449

A scholarly history of the technology of Guastavino vaulting accompanies archival images and beautiful new colour photography showcasing the most incredible

Guastavino vaulted spaces. Versatile, strong and fireproof, thin-tile vaults were built by Guastavino in more than two hundred major buildings in Manhattan and in over six hundred buildings across America.

作者介绍:

John Ochsendorf is an engineer and educator specialising in historic structures. He was awarded the Rome Prize from the American Academy in Rome and was named a MacArthur Fellow by the John D. and Catherine T. MacArthur Foundation. He is the Class of 1942 professor of architecture and civil and environmental engineering at the Massachusetts Institute of Technology.
