出版时间:2000-7

装帧:HRD

isbn:9780393730548

In this reference for building professionals, owners and managers, and individuals planning to purchase or renovate a building, an experienced investigator explains why buildings should be inspected. He discusses what to look for, how to do it, when to hire a professional, and how to understand what architects and engineers are talking about once a survey has been carried out. The scope includes ordinary wood-frame houses and small commercial structures as well as larger buildings.
