America has a wide variety of house styles, and this text aims to allow readers to recognize the architectural features of virtually any house they encounter. John Milnes Baker leads the reader through a series of plans and different characteristics to establish the different architectural styles. Each section begins with a historical overview of the period, followed by commentary. Baker shows how the different styles developed and what influenced their development. Through an understanding of earlier styles, insights into the architecture of our own era can be developed. This study of architectural styles should allow readers to make informed judgements about what is being built at the beginning of the 21st century.
