出版时间:2006-4

装帧:Pap

isbn:9780313313325

This book tells the story of Emanuel Goldberg, a chemist, inventor, and industrialist who contributed to almost every aspect of imaging technology in the first half of the 20th century. An incredible story emerges as Buckland unearths forgotten documents and rogue citations to show that Goldberg created the first desktop search engine, developed microdot technology, and designed the famous Contax 35 mm camera. It is a fascinating tribute to a great mind and a crucial period in the history of information science and technology.
