著者:Kumar, Krishan

出版者:Sage Pubns

出版时间:2005-3

装帧:HRD

isbn:9780761933168

In this revised edition, the author sharpens the focus and range of the original, arguing as his main thesis that colonialist and nationalist ideas and practices in education in India are not antagonistic. The new edition incorporates the complex terrain of gender, enriching the earlier discussion of caste, class and religion. It draws upon biographies and cultural history to highlight the revolutionary context in which girls' education made its reluctant start in the 19th century. In the new section on women's education, the author brings into focus the same set of linkages - between the emerging system of education and its policies, the social structure and ethos - which makes this an innovative study of educational ideas and practices. There are also some important additions to the discussion of caste and identity.
