装帧:Pap

isbn:9780321336255

Learn by doing! Follow along, step-by-step, as you upgrade a static HTML site that uses obsolete code to an XML standard-compliant, CSS-formatted dynamic site using

Microsoft Active Server Pages (ASP), Macromedia ColdFusion, or the open source PHP. Create several integrated applications for a fictional travel tour operator, including a searchable listing for tour descriptions, country profiles, and a tour price calendar. In this official Macromedia guide, you'll learn how to: *Use a relational database--Microsoft Access or MySQL--as the driving force behind a site *Use Dreamweaver's built-in server behaviors and application objects to assist in the rapid development of dynamic Web applications *Read and hand-code ASP VBScript, ColdFusion Markup Language, and PHP scripts well enough to understand how dynamic Web pages work, troubleshoot errors, and customize scripts *Collect and manipulate user-entered data, performing calculations on the fly *Use SQL to pass information between your pages and the database *Validate forms using client-side and server-side scripts
