isbn:9780072949384

ASP.Net has made the building of real world Web applications dramatically easier, by allowing great web pages to be built with far less code than the classic ASP program. David Mercer's "Programming The Web Using ASP.NET" has been tailored for instructors at either a 2 year or 4 year institutions, who are teaching a full term course

on ASP.NET. This textbook has been written by an expert in the field with the sole purpose of being used as a textbook, not a trade book. The depth of coverage in this textbook provides tomorrow's web programmers the background they need to be marketable as web developers.
