isbn:9780205407514

David A. Patterson and Randall E. Basham have produced the first book and CD-ROM to combine text, video and graphs to clearly describe and illustrate how social workers can use spreadsheets to collect data, analyze statistics and create graphs of research

results. Students and professionals will find this an excellent guide to taking advantage of spreadsheet software, an underutilized, inexpensive and commonly available data analytic tool found in most, if not all, agency settings. Data Analysis with Spreadsheets offer instructors clearly articulated descriptions and video demonstrations of data analysis procedures that are commonly referred to in research and practice evaluation texts. This text and CD-ROM present a variety of ways to select random samples and clearly demonstrate how to produce descriptive statistics, frequency distributions, and bivariate analyses using spreadsheets.
