Based on twenty-five years of research on friendship, Dr. Kenneth H. Rubin reveals the importance of children's social development to their emotional and intellectual growth-and future success. In *The Friendship Factor* he uses vivid case studies to differentiate normal development from potential problems and real distress, exploring how to:

- € Distinguish between a solitary child and a lonely child
- € Encourage the development of "popularity-as-likability," not "dominance"
- € Help an easily angered child be less aggressive

€ Increase a child's social ability with specific skills and strategies
