Do you wish your doctor had a "Healer's Heart"? In a modern telling of the story of the Bible's beloved physician, St. Luke, Diane Komp tells a compelling story of a doctor in search of his soul. Luke Taypsill, head of the AIDS program at Yale Medical School, finds a manuscript in his grandfather's desk that tells his family's history and possible predicts his death. His journey takes him to the war-torn, plague-ridden land of Sierra Leone, West Africa to answer his grandfather's question: If you don't have anything worth dying for, do you have a reason to live?
