Elegant Kate, walking a tightrope over an abyss of lies...sensitive, sensible,

self-contained Cecie...Ginger, the heiress, sexy, vibrant, richer than sin...and poor, hopeless, brilliant Fig--they came together as sorority sisters on a Southern campus in the '60s. Four young women bound by rare, blinding, early friendship--they spend two idyllic spring breaks at Nag's Head, North Carolina, the isolated strip of barrier islands where grand old weatherbeaten houses perch defiantly on the edge of a storm-tossed sea. Now thirty years later, they are coming back. They are coming back to recapture the exquisite magic of those early years...to experience again the love, the enthusiasm, the passion, pain, and cruel-betrayal that shaped the four young girls into women and set them all adrift on the..."Outer Banks."
