Born with autism, both authors now famously live successful social lives. But their paths were very different. Temple's logical mind controlled her social behavior. She interacted with many adults and other children, experiencing varied social situations. Logic informed her decision to obey social rules and avoid unpleasant consequences. Sean's emotions controlled his social behavior. Baffled by social rules, isolated and friendless, he made up his own, and applied them to others. When they inevitably broke his rules, he felt worthless and unloved. Both Temple and Sean ultimately came to terms with the social world and found their places in it. Whether you are a person with autism, a caregiver in the autism community, or just someone interested in an "outsider" view of society, their powerful stories will enthrall and enlighten you.

作者介绍:

Dr. Temple Grandin and Sean Barron use their colorful life stories to explain the unwritten rules and patterns of social relationships. They create guidelines for living and working with others and illustrate their infinite applications, in even the most complex situations. The authors' brilliant insights are invaluable to anyone who has ever felt "outside the norm" in school, at work, or when relating to people in general.

Dr. Grandin has received enormous accolades for her best-selling book *Animals in Translation: Using the Mysteries of Autism to Decode Animal Behavior*, but, more often than not, it's because she "has transformed autism from being an unfortunate disability to being an enviable advantage that many of us would give anything to experience." She and her co-author Sean Barron carry this mantle one gargantuan step further with *Unwritten Rules*. They give us insight into our own world like no one else has.
