isbn:9780198715535

作者介绍:

Sanjit Dhami is Professor of Economics at the University of Leicester. He studied at the Delhi School of Economics and the University of Toronto for his Masters, MPhil, and PhD degrees in economics. He has previously taught at the Universities of Toronto, Essex, and Newcastle. His research has mainly focused on behavioral economic theory and its applications. He has published on the axiomatic foundations of the various components of prospect theory, behavioral political economy using other-regarding preferences, behavioral time preferences, foundations of behavioral game theory, and applications in tax evasion, stochastic dominance concepts under other-regarding preferences, and in behavioral law and economics.

目录: Preface

Introduction

Part I: Behavioral Economics of Risk, Uncertainty, and Ambiguity

Introduction to Part I

1. The Evidence on Human Choice under Risk and Uncertainty

2. Behavioral Models of Decision Making

3. Applications of Behavioral Decision Theory

4. Human Behavior Under Ambiguity

Part II: Other-Regarding Preferences

Introduction to Part II

5. The Evidence on Human Sociality

6. Models of Other-Regarding Preferences

7. Human Morality and Social Identity

8. Incentives and Other-Regarding Preferences

Exercises

Part III: Behavioral Time Discounting

Introduction to Part III

9. The Evidence on Temporal Human Choice

10. Behavioral Models of Time Discounting

11. Applications of Present Biased Preferences

Exercises

Part IV: Behavioral Game Theory

Introduction to Part IV

12. The Evidence on Strategic Human Choice

13. Models of Behavioral Game Theory

Exercises

Part V: Behavioral Models of Learning

Introduction to Part V

14. Evolutionary Game Theory

15. Models of Learning

16. Stochastic Social Dynamics

Appendices and Exercises

Part VI: Emotions

Introduction to Part VI

17. Emotions and Human Behavior

18. Interaction Between Emotions and Cognition

Exercises

Part VII: Bounded Rationality

Introduction to Part VII

19. Judgment Heuristics

20. Mental Accounting

21. Bounded Rationality in Financial Markets

Exercises

Part VIII: Behavioral Welfare Economics

Introduction to Part VIII

22. Fixing Basic Ideas

23. Soft Paternalism

24. Regulation Under Imperfect Self-Information

25. Choice and Non-Choice Data: What is the Scope of Economics?

26. Choice-Based Behavioral Welfare Economics

27. Revealed Preference Under Limited Attention

28. The Contractarian Approach

Exercises

Part IX: Neuroeconomics

Introduction to Part IX

29. A Brief Introduction to the Brain

30. An Introduction to Neuroeconomic Techniques

31. The Neuroeconomics of Risky Decisions

32. The Neuroeconomics of Social Preferences

33. The Neuroeconomics of Time Preferences

34. The Neuroeconomics of Strategic Interaction

35. Pharmacoeconomics: An Application to Social Effects of Oxytocin

Appendix on Game Theory

Introduction

Normal form games

A basic taxonomy of some normal form games

Two person zero sum games

Selection criteria among Nash equilibria: Payoff dominance and Risk Dominance

Extensive form games

Games of incomplete information

Correlated equilibrium
