isbn:9781889392097

The average cost of providing for a new baby can top \$5, 000 in the first year alone. Baby Bargains shows parents how to save money while selecting the best brands and the safest products. This fourth edition includes extensive charts comparing name-brand cribs, strollers, and more; a new section on bassinets, car seats, and bicycle child carriers; and a completely updated guide to catalogs, online stores, and bargain Web sites.
