The Twelve Days of Summer takes readers on a joyous journey into summer, from the first discovery of three eggs in a sparrow's nest to the day when those eggs hatch. Readers will pore over the pictures, searching for that fifth bumblebee, that tenth crow, and for the thoughtfully chosen toy that turns up on each page: a parachute with the goatsbeard seeds, a fan with the ruffed grouse Award-winning writer and storyteller Jan Andrews lives in Lanark, Ontario. Susan R. Jolliffe is fascinated with all aspects of nature and lives in Ottawa, Ontario.
