A new and chilling study of lethal human exploitation in the Soviet forced labor camps, one of the pillars of Stalinist terror

In a shocking new study of life and death in Stalin's Gulag, historian Golfo Alexopoulos suggests that Soviet forced labor camps were driven by brutal exploitation and often administered as death camps. The first study to examine the Gulag penal system through the lens of health, medicine, and human exploitation, this extraordinary work draws from previously inaccessible archives to offer a chilling new view of one of the pillars of Stalinist terror.

医疗卫生史与暴政研究必然会结合到一起，这既反应在夹边沟的残尸枯骨上，也体现在刘卫黄的死亡证明里
