isbn:9780471193791

Janice VanCleave is America's favorite science teacher. Children love her wacky experiments that are fun and educational at the same time. Now any teacher can help students experience the VanCleave magic, with this collection of reproducible science experiments for children ages 8-12. It includes close to 300 experiments from Janice's previous books, with one experiment per page for easy copying. The experiments fall into five categories: astronomy, biology, chemistry, earth science, and physics.
