装帧:Pap

isbn:9781410917515

Without notice, Earth's surface can change drastically and dramatically. As this exciting drama fully plays out on each page of this series, readers confront the physical and social impact of events and their aftermath. Geography and social science are made

frighteningly real and relevant, as is the need for conservation and preventive measures. Each title includes a survival guide that recaps highlights from the book and provides a checklist of survival tips and precautions.
