The volume represents an introduction to the arcane tibetan art of healing. The author discusses the many components of tibetan buddhist medicine. Its religious, philosophical and psychological foundations, its history and deities, its tantric and ritual aspects and unusual methods of diagnosis and cure.

Forward by the Dalai Lama. Introduction by Lokesh Chandra. Discusses the religious philosophical and psychological foundations of Tibetan Buddhist medicine. Included is the first English translation of three important chapters on Tibetan medical psychiatry, and intelligent appraisal of the Tibetan classifications of types of insanity, an exploration of exorcism, demons, and tantric ritual meditations.
