著者:Bortz, Alfred B

出版者:Rosen Pub Group

出版时间:2004-2

装帧:LIB

isbn:9780823945306

The neutron has no electric charge and weighs nearly 1,840 times that of the electron.

Discovered by James Chadwick 1932, the neutron helped explain many phenomena from the existence of isotopes to atomic fission. Bortz's book illuminates the nature of this particle in an understandable manner for science-minded kids.
