Today's bathroom is more than a functional, utilitarian space-it is also a sanctuary and private retreat. The bathroom receives more remodeling dollars than any other room

in the house (except the kitchen). Today's bathroom is a center for both physical and mental relaxation, and IdeaWise: Bathrooms will show you how to get the most personal satisfaction from this all-important room. There are also good economic reasons for remodeling or adding a bathroom-a major bathroom project returns virtually its entire investment by adding value to your home.
