出版时间:2001-2-11

装帧:Paperback

isbn:9780596000660

This pocket reference puts within easy reach the commands that Oracle database administrators need most when operating in a Unix environment. If you are an Oracle DBA moving to Unix from another environment such as Windows NT or IBM Mainframe, you know that these commands are far different from those covered in most beginning Unix books. To jump start your learning process, Don Burleson has gathered together in this handy book the Unix commands he most often uses when managing Oracle databases. He begins by showing you how to combine simple commands to perform complex tasks. The book also covers process management commands that you can use to display and manage Oracle processes, as well as commands related to memory, CPU, semaphore management, monitoring, and disk management.

书评

对于DBA来讲是一本很实用的小册子。偏重于命令的讲解，同时针对不同UNIX环境进行了一定的区分，内容不多，但基本上都是在实务中需要理解和掌握的。
名副其实的Pocket Reference，建议掌握一定的UNIX/LINUX基础后阅读。
