isbn:9780763737207

True to its name, Java 5: Objects First presents object-oriented concepts right from the start. The text places significant emphasis on patterns, their associated solutions, and how to recognize and modify them. Its conversational, user-friendly style and numerous programming exercises aid students in their comprehension and retention of the material presented. Additional resources, including instructor's PowerPoint Lecture Slides, solutions to all exercises, and Student Lecture Companion, are also available.
