isbn:9780753816875

Krishnamurti, who founded schools in India, the USA and England to further his beliefs, presents lively and often intimate exchanges on practical and philosophical issues in the interests of teaching children to meet educational demands without conforming to conventional values. 'The subjects range from learning how to sit still with a quiet mind to coping with individuals - or discovering how to live sanely in an insane world' Sunday Telegraph 'Many of the discussions are concerned with a highly relevant problem: how to help children to meet the educational demands of their society without conforming to its conventional values' Observer
