isbn:9781559719308

This chunky board book series features bold, blackline illustrations of all the creatures and plants you can count at the lake, desert, jungle and ocean! The books count up to 10, and each page shows the numeral as well as the number spelled out. The simple rhyming text encourages children to join in. These books are a great first introduction to numbers as well as to the many plants and animals found in these habitats.
