

An Introduction to Programming and Object-oriented Design Using Java

[An Introduction to Programming and Object-oriented Design Using Java_下载链接1_](#)

著者:Nino, Jaime/ Hosch, Frederick A.

出版者:John Wiley & Sons Inc

出版时间:2004-10

装帧:Pap

isbn:9780471712275

Nino and Hosch have updated their popular introductory text that provides an objects first introduction to programming and software design using Java. The emphasis

throughout is on problem modeling using fundamental software engineering principles and concepts. Java used as a vehicle for teaching these topics. New constructs and features of Java 5.0, such as generics, are introduced. The text includes optional, interactive exercises using the DrJava integrated development environment (IDE). The UML is employed (very informally) for denoting objects, object relationships, and system dynamics. No specific previous programming experience is assumed, and the text is appropriate for first year computer science majors. The text could also carry over to a second course on data structures or software/OO design. About DrJava: DrJava is an IDE designed primarily for students and includes an easy to use facility for interactively evaluating Java code. Optional DrJava exercises are included throughout the text if instructors want their students doing more programming. DrJava is the IDE chosen by the authors, but any IDE can be used for these exercises. This update of the text provides Java code in newly released Version 5.0.
