The engaging new Life in the Sea set provides young readers with current, accessible information about the sea and its creatures. This comprehensive resource on the ocean's inhabitants presents living things in their physical habitats, emphasizing the relationship between marine biology and marine ecology. Each volume focuses on one

specific area of the marine world, discussing its physical characteristics, the living things found there, and the impact humans have on the area. The perfect companion to the Life On Earth set (see facing page), this invaluable reference presents a well-rounded view of marine life.
