Appropriate for all courses on Windows Server 2003 network infrastructure planning and maintenance; as well as all courses preparing students for Microsoft's 70-293 certification exam. This is a fast-paced study guide and refresher for every student seeking to master Microsoft Windows Server 2003 network infrastructure planning and maintenance, and especially for those preparing for Microsoft's MCSE/MCSA examination 70-293-one of the core exams in Microsoft's MCSE and MCSA certification programs. The book offers concise, high-efficiency review of every exam topic, including server roles and security; planning, implementing, and maintaining network infrastructure, routing, remote access, server availability, and security infrastructure; planning and maintaining network security; and more. Its extensive collection of study resources include exclusive test-taking strategies, time-saving study tips, two sample exams, a complete glossary, and a special Cram Sheet that includes tips, acronyms, and memory joggers. An accompanying CD-ROM contains PrepLogic Practice Tests, Preview Edition software, including one complete PrepLogic Practice Test with approximately the same number of questions found on Microsoft's actual exam, as well as thorough explanations of every correct and incorrect answer. The engine offers two study modes, Practice Test and Flash Review, full exam customization, and a detailed score report. The book is supported by an active online community at www.examcram2.com, where students can find industry news, study tips, practice exams, discussion boards, and more. Like all books in the Exam Cram 2 series, it has been published under the direction of Series Editor Ed Tittel, the leading authority on IT certification. Based on rigorous technical review by a team of industry experts, it has earned the distinction of CramSession Approved Study Material.
