This poster is an extremely useful reference to the most important and commonly used classes in the .NET Framework Standard Library. Designed under the guidance of the .NET Framework Class Library team at Microsoft, this handy, attractive, inexpensive poster will be appreciated by all .NET developers. For years, Java developers have enjoyed the Java Class Library posters published by Addison-Wesley. Now .NET developers have their own poster to decorate the walls of their offices, covering the most frequently used classes in the .NET Framework Standard Library. This poster is full-color on glossy paper and has been professionally designed to be useful and attractive. Based on a black and white poster included in copies of the .NET Framework Standard Library Annotated Reference, Volume 1, it has been expanded and reorganized so that it will appeal equally to owners of the book and to those who do not have the book yet.
