著者:O'Leary, Timothy J./ O'Leary, Linda I.

出版者:McGraw-Hill College

出版时间:2003-12

装帧:Pap

isbn:9780072943290

Developed and written to stimulate student learning, "Computing Today" actively engages students through a unique visual orientation, employing numerous screen shots and "how to" illustrations. Current topics and technology, such as a Personal

Digital Assistant (PDA), are skillfully woven throughout the book to catch students' interest and motivate them to learn more. And, when the reading is done, integrated exercises and activities provide plenty of opportunity to reinforce what they've learned.
