As a growing number of companies migrate to Linux, they're looking for trained and talented Linux administrators. You can gain the knowledge and skills you need to become such an administrator by completing SUSE Linux Administration (Course 3037 v2.0). This in-depth, hands-on course covers a variety of topics: installing and configuring SUSE Linux Enterprise Server 9, managing users and groups, securing the system and much more. By completing multiple lab exercises, you can practically apply course concepts and strengthen your proficiency in Linux administration. Before attending this course, you should have fundamental knowledge of SUSE Linux Enterprise Server in a computing environment. You can obtain this Linux foundation by completing Getting Started with Linux: Novell's Guide to CompTIA's Linux (Course 3060).
