Building your own barns and outbuildings offers many benefits, perhaps the most obvious being the money you can save. About half the costs of any building project is the labor, and, by doing it yourself, you can construct your building more

economically, or even put up a larger building on the same budget. But another important benefit of building it yourself is the satisfaction that comes from improving your own landscape and surroundings. A well-constructed barn, shed, or outbuilding can be a source of pride for many years -- and will also enhance the value of your property. In "How to Build Small Barns and Outbuildings," Monte Burch takes readers step by step through the fundamentals of general construction -- from planning and laying out a site to do-it-yourself instructions on framing, roofing, wiring, plumbing, and much more.
