A selection of thirty vintage wine posters reproduced in our new more generous postcard book format. Wine inspires passion in many people, and so it is not surprising that it has inspired many wonderful posters. The majority of those we include here are French, for it is there that wine culture has reached its pinnacle. We also have attractive examples from Germany, Spain and Italy. The examples we reproduce will delight poster enthusiasts but will also, with their variety and evocative power, please many who make wine an important part of their lives.
