By combining the techniques of stage performers (sound level, tone of voice, body language) with those of great teachers (pacing, graphic displays), these presentation tips will help teachers grab and hold students' attention. Precedent has shown that students are more likely to stay focused and absorb information when their attention is held. These effective strategies will help teachers and trainers facilitate engaging learning experiences through good management of their students' attention. Each tip has a definition, explanation, affirmation, skill integration activity, learning strategy, and self-reflection prompts.
